DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 20-23, are drawn to a vector operatively linked to a nucleic acid encoding a variable domain of a MN-specific antibody, with flexible linker polypeptides, capable of inhibiting growth of vertebrate cells.

Group II, claim(s) 24-27, are drawn to a vector encoding a cytotoxic protein or polypeptide and a cytokine linked to MN gene promoters, capable of inhibiting growth of vertebrate cells.

Group III, claim(s) 31-42, are drawn to a method of identifying an organic or inorganic molecule that binds to MN protein and inhibits adhesion of vertebrate cells to MN protein.

Group IV, claim(s) 43-44, are drawn to a repressor complex that binds to the MN gene promoter.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions lack a corresponding special technical feature. Inventions of group I, II, IV and III are drawn to products and a method, respectively, that do not relate to one another with a common underlying inventive concept. Therefore, they are novel and unobvious in view of each other and are patentably distinct from one another.

3. Because these inventions are distinct for the reasons given above and the search required for Group I-IV is not required for any other group from Group I-IV, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher H Yaen whose telephone number is 703-305-3586. The examiner can normally be reached on Monday-Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa can be reached on 703-308-3995. The fax phone numbers
